Construction

Water Treatment

We create or provide products and technologies that drive positive change in the industries we serve.

About us

Welcome to Olive & Branch Merchandizing & Distribution LLC!

Founded in 2021, Olive & Branch M&D is family owned and operated and is a merchandizing and distribution company for unique products at affordable prices. We are a supplier and distributor of unique specialty products and materials, including specialty chemicals and raw materials. We develop or source the products we sell and have the expertise and diligence to service our customers reliably and efficiently.

Our portfolio of chemicals is multifaceted and can address a diverse number of applications and uses, and service a wide range of industries. As a company, we strive to fulfill your needs by providing high quality specialty chemicals you can rely on, and to make your uniqueness your advantage.

At Olive & Branch M&D we always ensure our products meet the highest standards in production, quality, safety, and service. We currently offer products geared to the following industries: Oil & Gas, Construction, Water Treatment, and Manufacturing. The expectation is that additional industries and product categories will be added in the months and years to come. Our core application areas are shown below:

PRODUCT Brochure

We offer a growing portfolio of specialty chemicals and raw materials designed to support and enhance various applications in the industries we serve.

Cementing

Equipment
Maintenance

Production

Water
Treatment

Our Mission

To provide uniquely designed products that satisfy the product, service, and technical criteria our customers have. Our commitment is to make you or your company's uniqueness, your advantage.

Our Vision

Is that everyone can find that unique item in the marketplace that describes them or their situation, enabling them to excel and achieve incredible results

OUR COMPETITIVE ADVANTAGES

Integrity, Trust, & Transparency

Built on a foundation of integrity, trust, transparency, and in our belief in doing things the right way.

Research & Innovation

Continuous innovation and customer focus are tenets we adhere to. Our products improve performance and provide our customers with a valuable competitive advantage.

Business Agility

We are flexible, resourceful, and have a make-it-happen attitude. We can adapt faster and deliver on our product and service responsibilities, reliably.

Customer-centricity

We place the customer at the beginning of our value chain, not the end, by aligning customer strategies and priority areas with our own.

Innovation

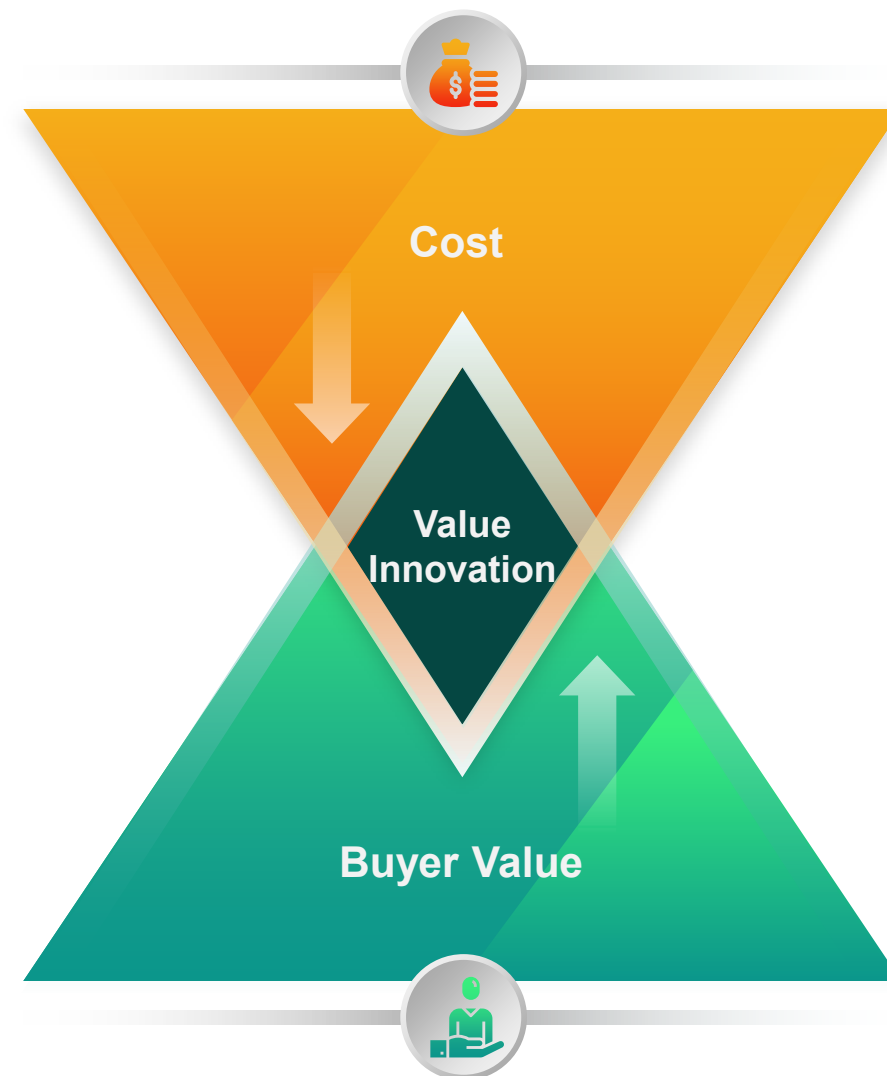

There is no innovation without science, and no science without research.

At Olive & Branch M&D our product development program is built on the belief that only strong research can create truly unique lasting products that can generate real results. Central to our research and innovation efforts is Value Innovation – the simultaneous pursuit of differentiation and Low Cost - and three key facets:

- **Advanced Research:** we are continuously researching to enrich our scientific knowledge about chemicals, raw materials, new active ingredients, and new advances in materials technology.
- **Innovation Assets:** unique active ingredients, formulation skills, and evaluation expertise, are what we call innovation assets. Our level of strength in these asset areas dictate our market competitive advantages.
- **Innovation Values:** underpinning our innovation strategy are fundamental values that influence each phase of our research and innovation process. These values are: - product safety is a priority, have respect for the environment, and a good price vs performance relationship is essential for success.

At Olive & Branch M&D, research and innovation, ingenuity, and honesty are part of our DNA.

Simultaneous Pursuit of Differentiation and Low Cost

Our Services

Apart from being a full-service specialty chemical supplier, Olive & Branch M&D also provides (1) a specialty chemical or material innovation and development service, and (2) a cementing application consultancy service. We help our clients redefine their product innovation and development needs, and also help them in achieving a successful cementing job.

Product Innovation & Development

Our product innovation and development service is geared toward Cementing products. We develop industry leading cementing solutions by integrating the latest sciences, technologies, and our experiences. Often, we can reduce time and expenditure from idea generation to field introduction and commercialization.

Cementing Consultant

Utilizing Lennox Leotaud's long and successful track record in the Oil & Gas Cementing industry as a trusted advisor for many, Olive & Branch M&D is able to provide a Cementing consulting service. Lennox has worked progressively in onshore and offshore cementing services both in the U.S. and internationally, and has held various positions in Operations, Engineering, and Technology at various oil & gas service companies. Lennox can help with the below Cementing services:

Our Products by Industry

Our product solutions cater to the below industries, currently.

Our portfolio of products enable our customer base to access leading innovation in their respective industries.

Oil & Gas

Our products are innovative, high performing, and economical.

Construction

Unique products that provide maximum impact.

Water Treatment

Patented, sustainable, and eco-friendly technologies.

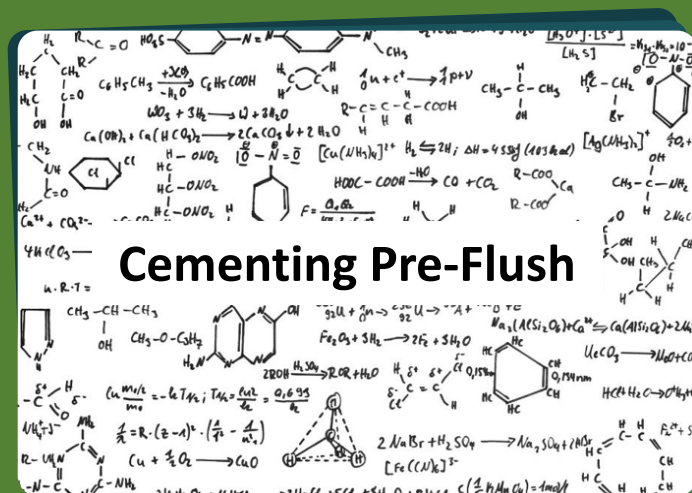

Our Industry Brief

The specialty chemicals and materials we offer are geared towards the oil & gas, construction, water treatment, and manufacturing industries. However, as a merchandizing & distribution company, the list of industries we serve and product categories we carry may increase in the future.

Featured Products

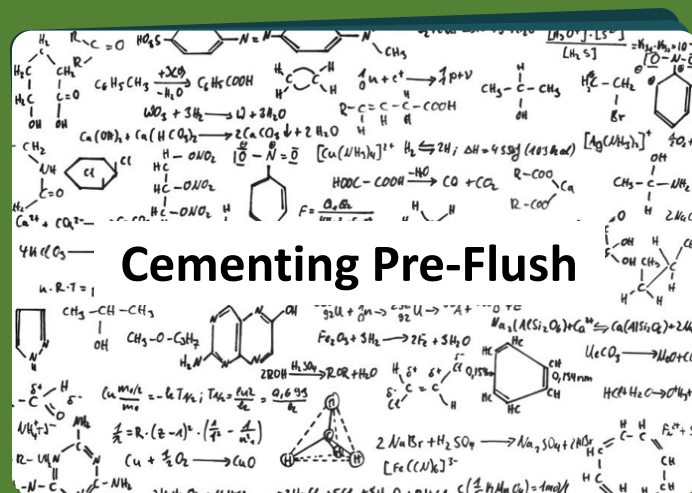

Listed below are some of our key products to meet your application needs.

This featured products listing showcases our innovative products, as well as new product introductions.

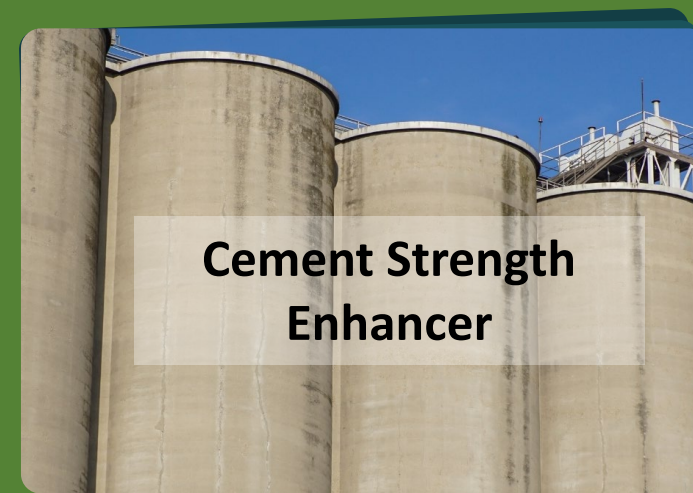

ProFlush WBD

Water-Based Pre-Flush designed to simultaneously wet wellbore surfaces and help remove water-based mud.

ProFlush OBD

Oil-Based Pre-Flush designed to simultaneously wet wellbore surfaces and help remove oil-based mud.

Cement Strength Enhancer

Oil Pro CSE

Unique enhanced early-age and ultimate compressive strength enhancer for oilwell cement and concrete.

Product Listing

Our specialty chemicals portfolio features a variety of effective products that each promote high performance and cost savings.

Visit our website at www.olivebranchmd.com for additional information on each product.

Industry	Application	Product Listing
Oil & Gas	Cementing	Oil Pro CLD-4 Liq. Defoamer
		ProFlush WBD Liq. Water-Based Pre-Flush
		ProFlush WBD-P Powder Water-Based Pre-Flush
		ProFlush WBD-223 Powder Water-Based Pre-Flush
		ProFlush OBD-1 Liq. Oil-Based Pre-Flush
		ProFlush OBD-2 Liq. Oil-Based Pre-Flush
		ProFlush OBD-22 Liq. Oil-Based Pre-Flush
		ProFlush OBD-P Powder Oil-Based Pre-Flush
		Lignosulfonate Cement Retarder 80 °F – 210 °F
		Mod. Lignosulfonate Cement Retarder 80 °F – 230 °F
		Oil Pro CSE Cement Strength Enhancer
		Cement Dispersant Fresh & Saltwater Tolerant
	Drilling & Completions	No-Trenie Pipe on Pipe Friction Reducer
	Equipment Maintenance	No-Stik Cement Anti-Stick Liquid
		No-Siment Liq. Cement/Concrete Softener & Dissolver
Production	No-Alkanes Paraffin Inhibitor/Dispersant	

Product Listing

Our specialty chemicals portfolio features a variety of effective products that each promote high performance and cost savings.

Visit our website at www.olivebranchmd.com for additional information on each product.

Industry	Application	Product Listing
Construction	Concrete Paving	Plasticizer
		Superplasticizer
	Equipment Maintenance	No-Stik Cement Anti-Stick Liquid
		No-Siment Liq. Cement/Concrete Softener & Dissolver
	Road Building	SAF Slag
Soil Stabilization	SoilBinder® Soil Stabilizer	
Water Treatment	Cooling Tower/Heat Exchanger Water Treatment	HiCycler® Water Conservation Process
		CB-2 ChemBase® Multi-Metal Corrosion Inhibitor
	Lift Station FOG Remediation	Oxi® 3 Bio-Remediation Process
	Lift Station/Wastewater Treatment Plant Remediation	Bacteria
Manufacturing	Product Manufacturing	SAF Slag

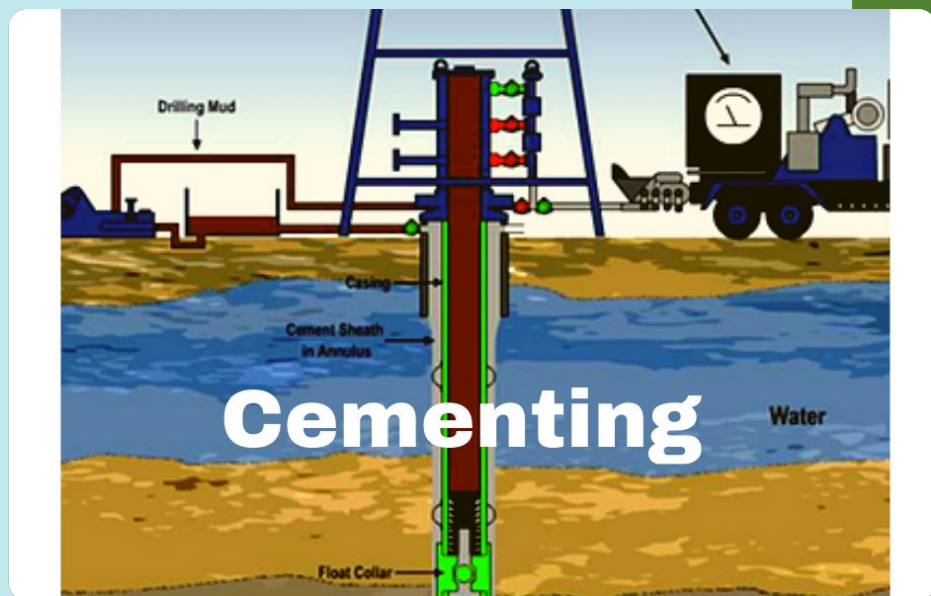

Improved early-age Compressive Strength

Provides improved early-age and ultimate compressive strength in cement and concrete.

Multi-use application in cement & concrete

Compressive strength enhancer, SCM, cement replacement, and other uses.

Oil Pro CSE

Cement Strength Enhancer

Improves compressive strength development in cement and concrete systems through chemical and mechanical means. A unique and multi-faceted use/application product, Oil Pro CSE provides many advantages from a price and performance perspective.

Version	Use / Applications	Max Use Temp	Conc. in Oilwell Cement
Oil Pro CSE-2	Compressive strength enhancer, SCM, & Cement replacement.	230°F	± 3% to 12%
Oil Pro CSE-3	Compressive strength enhancer, SCM, & Cement replacement.	≥375°F	± 3% to 12%

ProFlush OBD

Innovative oil-based pre-flush designed for use in any oil-based mud environment. The ProFlush OBD range of products will significantly assist in wellbore cleaning and in preparing the wellbore for the placement of cement.

Features	ProFlush OBD-1	ProFlush OBD-2	ProFlush OBD-22	ProFlush OBD-P
Excellent water-wetting properties	✓	✓	✓	✓
Excellent mud removal efficiency	✓	✓	✓	✓
Interfacial viscosity reduction (<i>Good, Very Good, Excellent</i>)	<i>Very Good</i>	<i>Excellent</i>	<i>Excellent</i>	<i>Very Good</i>
Eco-friendly (<i>Good, Very Good, Excellent</i>)	<i>Excellent</i>	<i>Excellent</i>	<i>Very Good</i>	<i>Excellent</i>

No-Alkanes

No-Alkanes is a fast-acting paraffin wax inhibitor, dispersant, cleaner, and solvent for heavy asphalt. It is designed to control wax deposition in pipelines, increase production output, and reduce the frequency of workover operations.

Production Improvement

Fast-Acting

Flow Assurance

Removes or prevents deposition of paraffin wax on oil pipeline walls.

Tank Cleaning

Effective at and many benefits in above ground storage tank cleaning.

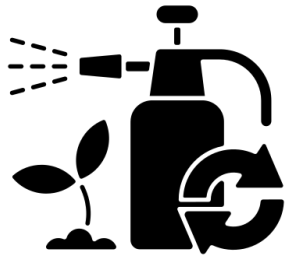

Equipment Cleaning

Lubricating oil, grease, asphalt, and oilfield equipment cleaning.

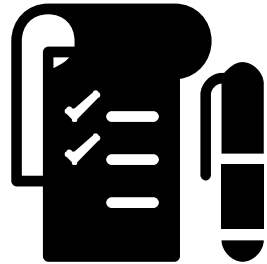

No-Stik

No-Stik is an oil-based cement and concrete anti-stick agent that provides an economical means of preventing cement or concrete from sticking to equipment, when that equipment is used in cement and concrete mixing, or cement and concrete pumping and pouring applications.

Eco-Friendly & Easy Apply

Checks All The Boxes

Cement Anti-Stick

Prevents cement or concrete from sticking to metal and other surfaces.

Detergency

Effective removal of soil and stains from equipment.

Degreaser

Effective removal of grease, oil, and grime from equipment.

Cement Splatter on Painted Blue Metal

Applying Concrete Form Release Agent

Our Team Members

We are innovation pioneers driving change wherever we can in the industries we operate in. Our passion and unique perspectives propel every idea, concept, and solution we create or provide.

Below are the leaders guiding our company into a successful and sustainable future.

Lennox Leotaud

President and Co-Owner

His other day job is taking care of his trusty sidekick German Shepherd, Skye.

Thank You !

Olive & Branch M&D is committed to the highest level of customer service. We take a customer centric approach to making sure your experience, is always positive.
